³Center for Studying Cool Things, University of X, City, Country

Author Contribution Statements

Geomorphica mandates that all authors take public responsibility for their submitted works. The contributions of all authors must be described in this section. An author's name may appear multiple times; however, it must appear at least once. For instance, "N.F. and N.S. conceptualized the research. N.S. and N.T. conducted field surveys. N.F. and N.T. handled XYZ analysis, etc." All authors must affirm that they have reviewed the results and endorsed the manuscript's final version for publication. For single authors, use the statement: "Author A.B. confirms sole responsibility for the study's conception, design, data collection and analysis, interpretation of results, and manuscript preparation."

Acknowledgements

Express gratitude towards all individuals and/or entities that contributed to the work's completion. If specific permissions were obtained for the research (e.g., access to restricted areas, data, or materials), mention them here. If your work are conducted in the native lands of indigenous people, a land acknowledgment statement should be included. Do not include funding source information in this section.

Data and Code Availability

Authors must guide readers to an open-access permanent repository where the study's data and code are accessible, either as supplementary materials available online with the main article on our website, or uploaded to FAIR data repositories, such as Zenodo, figshare, and Dryad. Include citations (such as DOIs) for datasets and code in the references. While GitHub is not considered a permanent repository, authors are advised to archive a snapshot

*Corresponding author: a.firstauthor@university.edu

23 of GitHub-hosted code on Zenodo. Statements such as “data and codes will be available upon request to authors”
24 are NOT acceptable for publication in Geomorphica.

25 **Funding Statement**

26 Geomorphica requires authors to specify any funding sources (institutional, private, or corporate) supporting the
27 reported work. This information should list the funding organization(s) and grant number(s) (if applicable), and
28 it should be provided upon submission. If no funding was received, authors should state: “This research did not
29 receive any specific grant from funding agencies in the public, commercial, or not-for-profit sectors.”

30 **Conflict of Interest Disclosure**

31 Declare any competing interests, financial or otherwise, pertaining to any of the authors. If there are none, state
32 that the authors have no competing interests.

33 **Permission to Reproduce Material from Copyrighted Sources**

34 If this manuscript reproduces content (texts, figures, videos, codes, or other materials) from copyrighted sources,
35 detail the obtained permission(s) here. If none, simply state: “The authors declare that no material from copy-
36 righted sources was reproduced in this manuscript.”
